

MAKING THE PAST, PRESENT.

PRINT AT HOME TRADING CARD - INSTRUCTIONS

Printer Paper Size: 8.5" x 11", 6 finished cards

Instructions:

We suggest using brochure double-sided paper or card-stock for a nicer appearance than everyday copy paper.

**Refer to our YouTube channel for a "How To" video on "Print at Home Cards".*

- 1.) Please print your first page (front design).
- 2.) After allowing the paper to dry a few minutes, re-insert the printed page in the printer. Print second page (back design). (**Please read your printer manual on how to load your paper for double-sided printing.*)
- 3.) Again, allow the paper to dry. Then, cut along the black trim lines. A paper-cutter works best.

YOUR CARDS ARE NOW READY!
